Stress	34
Work-related upper limb disorder	39
Contributors	44

Introduction

Welcome to the second edition of Kennedys' occupational disease guide.

Kennedys' aim is to help clients stop problems at source and only use lawyers when they really need to. The contributors to this guide are a talented group who have thought long and hard about each section with the aim of giving claims handlers what they need in order to help do their jobs better, smarter and faster.

Disease claims are putting considerable pressure on claims departments and on behalf of the Kennedys occupational disease team I hope you find this guide a useful tool.
